### SECTION 4: First aid measures

#### 4.1. Description of first aid measures

##### General information

Move victim out of danger zone. If unconscious but breathing normally, place in recovery position and seek medical advice. Never give anything by mouth to an unconscious person or a person with cramps. IF exposed:

SECTION 6: Accidental release measures

##### After inhalation

Provide fresh air. In case of breathing difficulties administer oxygen. Medical treatment necessary.

##### After contact with skin

IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower].

Medical treatment necessary.

##### After contact with eyes

If product gets into the eye, keep eyelid open and rinse immediately with large quantities of water, for at least 5 minutes. Subsequently consult an ophthalmologist.

##### After ingestion

Rinse mouth immediately and drink plenty of water.

Caution if victim vomits: Risk of aspiration!

#### 4.2. Most important symptoms and effects, both acute and delayed

Sensitisation to the respiratory tract. May cause allergy or asthma symptoms or breathing difficulties if inhaled.

Symptoms can occur only after several hours. Persons already sensitised to diisocyanates may develop allergic reactions when using this product. Persons with a history of asthma, allergies, chronic or recurrent respiratory disease should not be exposed to any process in which this product is used.

#### 4.3. Indication of any immediate medical attention and special treatment needed

May cause sensitisation especially in sensitive humans. Symptoms may develop several hours following exposure; medical observation therefore necessary for at least 48 hours. Treat symptomatically.
